Selected characteristics

Certaines caractéristiques

### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

|            |          |                |          |
|------------|----------|----------------|----------|
| St. John's | 772-4073 | Sturgeon Falls | 753-4888 |
| Halifax    | 426-5331 | Winnipeg       | 949-4020 |
| Montréal   | 283-5725 | Regina         | 359-5405 |
| Ottawa     | 992-4734 | Edmonton       | 420-3027 |
| Toronto    | 966-6586 | Vancouver      | 666-3691 |

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

|   |                      |
|---|----------------------|
| Newfoundland & Labrador                               | Zenith 07037         |
| Nova Scotia, New Brunswick & Prince Edward Island     | 1-800-565-7192       |
| Québec  | 1-800-361-2831       |
| Ontario   | 1-800-268-1151       |
| Manitoba  | 1-800-282-8006       |
| Saskatchewan  | 1 (112)-800-667-3524 |
| Alberta   | 1-800-222-6400       |
| British Columbia (South & Central)                    | 112-800-663-1551     |
| Yukon & Northern B.C. (area served by NorthwTel Inc.) | Zenith 08913         |
| Northwest Territories                                 | Zenith 22015         |

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

|            |          |                |          |
|------------|----------|----------------|----------|
| St. John's | 772-4073 | Sturgeon Falls | 753-4888 |
| Halifax    | 426-5331 | Winnipeg       | 949-4020 |
| Montréal   | 283-5725 | Regina         | 359-5405 |
| Ottawa     | 992-4734 | Edmonton       | 420-3027 |
| Toronto    | 966-6586 | Vancouver      | 666-3691 |

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de référence régionaux:

|   |                      |
|---|----------------------|
| Terre-Neuve et Labrador   | Zénith 07037         |
| Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard                       | 1-800-565-7192       |
| Québec  | 1-800-361-2831       |
| Ontario   | 1-800-268-1151       |
| Manitoba  | 1-800-282-8006       |
| Saskatchewan  | 1 (112)-800-667-3524 |
| Alberta   | 1-800-222-6400       |
| Colombie-Britannique (région sud et centrale)                                     | 112-800-663-1551     |
| Yukon et le nord de la Colombie-Britannique (région desservie par NorthwTel Inc.) | Zénith 08913         |
| Territoires du Nord-Ouest   | Zénith 22015         |

### Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

## INTRODUCTION

This report presents final statistics from the 1981 Census on selected dwelling characteristics for Canada and the provinces.

In Tables 1 to 6, data on occupied private dwellings by tenure are cross-classified with other dwelling characteristics such as period of construction, number of rooms, number of bathrooms, main type of heating equipment and principal fuels, according to urban size groups, rural non-farm and rural farm.

Data on condition of dwelling and tenure are cross-classified with structural type in Table 7, and with period of construction in Table 8.

Table 9 presents data on owner-occupied non-farm dwellings by structural type, showing value of dwelling. In Table 10, dwellings by type of household and size are cross-classified with number of persons per room, condition of dwelling, number of bathrooms and central heating equipment for Canada and provinces.

## DEFINITIONS

**Dwelling.** Refers to a set of living quarters in which a person or group of persons resides or could reside.

**Occupied Private Dwelling.** Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing reports are for occupied private dwellings rather than unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

**Owner-occupied Private Non-farm Dwelling.** Refers to a private dwelling, other than one situated on a farm and occupied by a farm operator, which is owned or being bought by some member of the household.

**Private Household.** Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

**Bathroom.** Refers to the sum of the number of complete and half bathrooms in a dwelling.

## INTRODUCTION

Ce bulletin présente les statistiques définitives du recensement de 1981 relatives à certaines caractéristiques des logements, pour le Canada et les provinces.

Aux tableaux 1 à 6, les données sur les logements privés occupés selon le mode d'occupation sont recoupées avec d'autres caractéristiques des logements comme la période de construction, le nombre de pièces et de salles de bains, le système de chauffage principal et les principaux combustibles utilisés, pour les régions urbaines par groupe de taille ainsi que les régions rurales non agricoles et rurales agricoles.

Les données sur l'état des logements et leur mode d'occupation figurent au tableau 7 selon le type de construction, et au tableau 8 selon la période de construction.

Le tableau 9 renferme des données sur les logements non agricoles occupés par leur propriétaire selon le type de construction par la valeur du logement. Les données sur les logements selon le genre et la taille du ménage paraissent au tableau 10 avec recoupements selon le nombre de personnes par pièce, l'état du logement, le nombre de salles de bains et le système de chauffage central, pour le Canada et les provinces.

## DÉFINITIONS

**Logement.** Ensemble de pièces d'habitation qu'une personne ou un groupe de personnes habitent ou pourraient habiter.

**Logement privé occupé.** Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Sauf indication contraire, toutes les données présentées dans les publications sur le logement se rapportent aux logements privés occupés et non à des logements privés inoccupés ou à des logements occupés par des résidents étrangers et (ou) temporaires.

**Logement privé non agricole occupé par son propriétaire.** Logement privé autre qu'un logement situé dans une ferme et occupé par un exploitant agricole, qui appartient à un membre du ménage ou est payé par celui-ci.

**Ménage privé.** La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

**Salle de bains.** Nombre total de salles de bains complètes et de demi-salles de bains dans un logement.

**Complete Bathroom.** Refers to the number of complete bathrooms in a dwelling. That is, the number of bathrooms that contain at least a flush toilet, a wash basin and a bathtub or shower.

**Half Bathroom.** Refers to the number of half bathrooms in a dwelling. That is, the number of bathrooms that contain at least a flush toilet and a wash basin but which lack a bathtub or shower. Other possible combinations of facilities are considered as "none" for census purposes.

**Central Heating Equipment.** Refers to whether or not a dwelling has a central heating system. This variable is derived by collapsing specific responses from the MAIN TYPE OF HEATING EQUIPMENT question.

The collapsing strategy is as follows:

- With central heating
  - Steam or hot water furnace
  - Forced hot air furnace
  - Installed electric heating system
- Without central heating
  - Heating stove, cooking stove, space heater
  - Other (fireplace, etc.)

**Condition of Dwelling.** Refers to whether, in the judgement of the respondent, the dwelling requires any repairs (excluding desirable remodelling or additions).

Regular maintenance refers to painting, furnace cleaning, etc. Minor repairs refers to missing or loose floor tiles, bricks, or shingles, defective steps, railing or siding, etc. Major repairs refers to defective plumbing or electrical wiring, structural repairs to walls, floors or ceilings, etc.

**Household Size.** Refers to the number of persons in a PRIVATE HOUSEHOLD.

**Household Type.** Refers to the basic division of private households into FAMILY and NON-FAMILY HOUSEHOLDS. FAMILY HOUSEHOLD refers to a household that contains at least one census family (e.g., persons living in the same dwelling who have a husband-wife or parent-never-married child relationship). ONE-FAMILY HOUSEHOLD refers to a single census family that occupies one private dwelling. The family may be that of the household reference person or one living as a related, lodging or other type of family with a household reference person who is a non-family person. A MULTIPLE-FAMILY HOUSEHOLD is one in which two or more census families occupy the same private dwelling. One family may be that of the household reference person, or the household reference person may be a non-family person with whom two or more census families are residing.

**Salle de bains complète.** Nombre de salles de bains complètes dans un logement. Une salle de bains complète comprend au moins une toilette avec chasse d'eau, un lavabo et une baignoire ou une douche.

**Demi-salle de bains.** Nombre de demi-salles de bains dans un logement. Une demi-salle de bains comprend une toilette avec chasse d'eau et un lavabo, mais pas de baignoire ni de douche. Toute autre combinaison possible d'installations sanitaires correspond à "Aucune" aux fins du recensement.

**Système de chauffage central.** Indique si le logement est pourvu d'un système de chauffage central. Cette variable s'obtient par l'agrégation des réponses à la question sur le SYSTÈME DE CHAUFFAGE PRINCIPAL.

Les données recueillies ont été agrégées de la façon suivante:

- Avec chauffage central
  - Système à vapeur ou à eau chaude
  - Système à air chaud
  - Système électrique (par ex., radiateurs de plinthe fixes)
- Sans chauffage central
  - Poêle de chauffage ou de cuisine, fournaise de plancher, appareil électrique
  - Autre (par ex., foyer)

**État du logement.** Sert à déterminer si, de l'avis du répondant, le logement a besoin de réparations (à l'exclusion des rénovations ou des rajouts souhaités).

Par entretien régulier, on entend la peinture, le nettoyage du système de chauffage, etc.; les réparations mineures sont les travaux requis pour remplacer des carreaux de plancher détachés ou manquants, des briques descellées, des bardeaux arrachés, des marches, des rampes ou le revêtement extérieur défectueux, etc.; les réparations majeures concernent la plomberie ou une installation électrique défectueuse, les réparations aux murs, planchers ou plafonds, etc.

**Taille de ménage.** Nombre de personnes dans un MÉNAGE PRIVÉ.

**Genre de ménage.** Répartition fondamentale des ménages privés en MÉNAGES FAMILIAUX et en MÉNAGES NON FAMILIAUX. Un MÉNAGE FAMILIAL est un ménage qui comprend au moins une famille de recensement, par exemple des personnes qui habitent le même logement et qui ont des liens conjugaux (époux-épouse) ou des liens de filiation (parent et enfant jamais marié). Un MÉNAGE UNIFAMILIAL se compose d'une seule famille de recensement qui occupe un logement privé. Il peut s'agir de la famille de la personne repère du ménage ou d'une famille apparentée, d'une famille chambreuse ou de tout autre genre de famille vivant avec une personne repère hors famille. Un MÉNAGE MULTIFAMILIAL se compose de deux familles de recensement ou plus qui occupent le même logement privé. Une de ces familles peut être celle de la personne repère du ménage ou il peut s'agir d'une personne repère hors famille vivant avec deux familles de recensement ou plus.

**NON-FAMILY HOUSEHOLD** refers to one person who lives alone in a private dwelling, or to a group of persons who occupy a private dwelling and do not constitute a census family.

**Census Family.** Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

**Census Family Type.** Refers to the classification of census families in terms of whether or not they maintain their own household (i.e., whether the person responsible for household payments - rent, or mortgage, or taxes, or electricity, etc. - is a member of a census family).

**Primary family** refers to the census family in which a person responsible for household payments is a member.

**Secondary family** refers to any census family in which a person responsible for household payments is not a member.

If the person identified as responsible for the household payments is a non-family person, or resides elsewhere, no primary family will exist in the household regardless of whether Person 1 is a census family member. Accordingly, any census family in such a household will be classified as a secondary census family.

In 1981, the criterion for determining family type was changed. A new question was added to the census questionnaire to determine a person responsible for paying the rent, or mortgage, or taxes, or electricity, and is used to identify primary and secondary families.

In previous censuses, the primary family was defined as the family of the head of the household. While we anticipate that in the majority of cases the person responsible for household payments will also be considered as the household reference person (Person 1), this will not always be the case.

**Census Family Household Composition.** Refers to the classification of census families in terms of the presence and number of "additional persons" in the household.

**Additional persons** refers to any household members who are not members of the census family being considered. These additional persons may be either members of another census family, or non-family persons.

**Census Family Status.** Refers to the classification of the population into family and non-family persons.

Un **MÉNAGE NON FAMILIAL** est constitué d'une personne qui vit seule dans un logement privé ou d'un groupe de personnes qui partagent un seul logement privé, mais ne forment pas une famille de recensement.

**Famille de recensement.** Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement.

**Genre de famille de recensement.** Les familles de recensement sont classées selon qu'elles soutiennent ou non leur propre ménage, c'est-à-dire que la personne qui est responsable du paiement du loyer ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., fait partie ou non d'une famille de recensement.

**Famille principale** - Famille de recensement dont fait partie la personne responsable des paiements du ménage.

**Famille secondaire** - Famille de recensement dont la personne responsable des paiements du ménage ne fait pas partie.

Si la personne déclarée comme responsable des paiements du ménage est une personne hors famille ou habite ailleurs, il n'y a pas de famille principale dans le ménage, même si la Personne 1 fait partie d'une famille de recensement. Par conséquent, toute famille de recensement dans un tel ménage est considérée comme une famille de recensement secondaire.

Le critère utilisé pour déterminer le genre de famille a été modifié en 1981. Une nouvelle question dans le questionnaire permet de connaître la personne responsable du paiement du loyer, ou de l'hypothèque, ou des taxes, ou de l'électricité, etc., et sert à déterminer les familles principales et secondaires.

Dans les recensements antérieurs, la famille principale était celle du chef de ménage. Quoique, dans la majorité des cas, la personne responsable des paiements du ménage sera probablement la personne repère du ménage (Personne 1), ce ne sera pas toujours le cas.

**Composition du ménage avec famille de recensement.** Les familles de recensement sont classées selon le nombre d' "autres personnes" dans le ménage.

L'expression **autres personnes** désigne les membres du ménage qui ne font pas partie de la famille de recensement prise en considération. Il peut s'agir de membres d'une autre famille de recensement ou de personnes hors famille.

**Situation des particuliers dans la famille de recensement.** Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

**Family persons** refers to household members who belong to a census family. They, in turn, are further classified as follows:

The terms **Husband** and **Wife** refer to persons living in the same dwelling as their spouse. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as a husband-wife family in the relevant tables.

**Lone parent** refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.

**Child** refers to sons and daughters (including adopted and step-children) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

**Non-family persons** refers to household members who do not belong to a census family. They may be **related** to the household reference person - Person 1 - (e.g., brother-in-law, cousin, grandparent) or **unrelated** (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

**Main Type of Heating Equipment.** Refers to the main type of heating equipment used to heat the dwelling. Supplementary sources are not included.

**Number of Persons Per Room.** Refers to the number of persons per room in a dwelling. (See definition of ROOM.) This is a derived variable.

**Period of Construction.** Refers to the period in time (approximate dates) during which the building or dwelling was originally constructed.

**Principal Heating Fuel.** Refers to the fuel used most for heating the dwelling.

**Principal Water Heating Fuel.** Refers to the fuel used most for heating water.

**Room.** Refers to the number of rooms in a dwelling. A ROOM is an enclosed area within a dwelling which is finished and suitable for year-round living.

Partially divided L-shaped rooms are considered to be separate rooms if they are considered as such by the respondent (e.g., L-shaped dining-room living-room arrangements). Not counted as rooms are bathrooms, halls, vestibules and rooms used solely for business purposes.

**Personnes faisant partie d'une famille** - Membres d'un ménage qui font partie d'une famille de recensement. Ces personnes sont classées comme suit:

**Époux ou épouse** - Personne qui habite le même logement que son conjoint. Les personnes vivant en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal, et figurent donc comme des familles époux-épouse dans les tableaux.

**Parent seul** - Mère ou père, sans conjoint, qui habite un logement avec un ou plusieurs enfants célibataires (jamais mariés).

**Enfant** - Fils et filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur état matrimonial au moment du recensement, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

**Personnes hors famille** - Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être **apparentés** à la personne repère du ménage, la Personne 1 (par ex., beau-frère, cousine ou grand-père) ou **non apparentés** (par ex., chambreur, compagne d'appartement ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille.

**Système de chauffage principal.** Principal mode de chauffage utilisé pour chauffer le logement. Les sources de chauffage d'appoint ne sont pas comprises.

**Nombre de personnes par pièce.** Nombre de personnes par pièce du logement (voir la définition de PIÈCES). Il s'agit d'une variable dérivée.

**Période de construction.** Période (dates approximatives) au cours de laquelle l'immeuble ou le logement a été construit.

**Principal combustible utilisé pour le chauffage.** Principal combustible utilisé pour chauffer le logement.

**Principal combustible utilisé pour chauffer l'eau.** Principal combustible utilisé pour chauffer l'eau du logement.

**Pièce.** Nombre de pièces dans un logement. Une PIÈCE est un espace fermé, fini et habitable à l'année.

Les pièces partiellement divisées en forme de "L" sont considérées comme formant deux pièces distinctes, si le recensé les juge distinctes (par ex., les salons et les salles à manger en forme de L). Ne sont pas comptés comme pièces, les salles de bains, les corridors, les vestibules et les pièces servant exclusivement à des fins commerciales.

**Structural Type.** Refers to the structural arrangements of the dwelling.

Single House (or Single Detached)

Refers to a single dwelling not attached to any other building and surrounded on all sides by open space.

Semi-detached or Double House

Refers to one of two dwellings attached side by side but not attached to any other building and surrounded on all other sides by open space.

Duplex

Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.

Row House

Refers to one of three or more dwellings joined side by side but not having any other dwellings either above or below.

Apartment in a Building That Has Five or More Storeys

Refers to a dwelling unit in a high-rise apartment building.

Apartment in a Building That Has Less Than Five Storeys

Refers to a dwelling unit in a triplex, quadruplex or a dwelling unit in a non-residential building or in a house that has been converted.

House Attached to a Non-residential Building

Refers to a single dwelling attached at ground level to another building (such as a store, etc.) but separated from it by a common wall running from ground to roof.

Mobile Home

Refers to a dwelling which has been designed and constructed to be transported on its own chassis and capable of being moved on short notice.

Other Movable Dwelling

Refers to a dwelling such as a tent, travel trailer, railroad car or houseboat.

**Type de construction.** Type de construction du logement.

Maison individuelle (ou logement individuel non attenant)

Logement individuel non attenant à une autre construction et entouré d'espaces libres.

Maison jumelée ou maison double

Deux logements côte à côte réunis par un mur commun, mais non attenants à une autre construction, et entourés d'espaces libres.

Duplex

Deux logements superposés non attenants à une autre construction et entourés d'espaces libres.

Maison en rangée

Logement dans une rangée d'au moins trois logements réunis côte à côte sans autre logement au-dessus ou en dessous.

Appartement dans un immeuble de cinq étages et plus

Logement dans une tour d'habitation.

Appartement dans un immeuble de moins de cinq étages

Logement dans un triplex ou un quadruplex, dans une construction non résidentielle ou dans une maison qui a été transformée.

Maison attenante à une construction non résidentielle

Logement individuel attenant au niveau du sol à une autre construction, par ex., un magasin, mais qui en est séparé par un mur commun s'élevant du sol au toit.

Habitation mobile

Logement conçu et construit pour être transporté sur son propre châssis et qu'on peut déplacer sans grand délai.

Autre logement mobile

Logement tel qu'une tente, une roulotte de voyage, une voiture de chemin de fer ou un bateau-maison.

**Tenure.** Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

**Value of Dwelling.** Refers to the amount expected by the owner if the dwelling were to be sold.

**Urban Population.** Refers to persons living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

**Urban Population Size Group.** Refers to the classification used in tabulations where the urban areas are distributed according to the following size groups:

|          |          |
|----------|----------|
| 1,000-   | 2,499    |
| 2,500-   | 4,999    |
| 5,000-   | 9,999    |
| 10,000-  | 29,999   |
| 30,000-  | 99,999   |
| 100,000- | 499,999  |
| 500,000  | and over |

Urban areas are defined using population data from the previous census. It can therefore occur that an area meeting the criteria and defined as urban according to the population data of the 1976 Census will contain fewer than 1,000 people according to the 1981 Census. Where this occurs the population is assigned to the urban population size group 1,000 to 2,499.

**Rural Population.** Refers to persons living outside "Urban Areas".

**Rural Non-farm Population.** Refers to all persons living in rural areas and who are not members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural non-farm population was defined as all persons living in rural areas in dwellings other than those situated on census farms.

**Rural Farm Population.** Refers to all persons living in rural areas who are members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural farm population was defined as all persons living in rural areas in dwellings situated on census farms.

**Mode d'occupation.** Indique si le logement est possédé ou loué par un membre du ménage.

Un logement est classé "possédé" même s'il est hypothéqué ou grevé d'une autre créance. Le logement peut être situé sur un terrain donné ou pris en location, ou encore faire partie d'un condominium enregistré ou non.

Un logement est classé "loué" même s'il est donné en location sans loyer en argent ou à un loyer réduit, ou qu'il fait partie d'une coopérative. Aux fins du recensement, tous les membres d'une coopérative ont des parts dans cette coopérative et occupent leur logement en vertu d'un bail.

**Valeur du logement.** Montant que s'attendrait de recevoir le propriétaire s'il vendait son logement.

**Population urbaine.** Personnes demeurant dans une région qui a une concentration démographique de 1,000 habitants et plus, et une densité de population de 400 habitants ou plus au kilomètre carré.

**Groupe de taille de la population urbaine.** Classement utilisé dans les tableaux où la répartition des régions urbaines est indiquée selon les groupes de taille suivants:

|          |         |
|----------|---------|
| 1,000-   | 2,499   |
| 2,500-   | 4,999   |
| 5,000-   | 9,999   |
| 10,000-  | 29,999  |
| 30,000-  | 99,999  |
| 100,000- | 499,999 |
| 500,000  | et plus |

Les régions urbaines sont définies à partir des données démographiques du recensement précédent. Il peut arriver qu'un territoire répondant aux critères et défini comme urbain selon les données démographiques du recensement de 1976 contienne moins de 1,000 personnes selon les résultats du recensement de 1981. Dans ce cas la population de ce territoire fera partie du groupe de taille de la population urbaine 1,000 à 2,499.

**Population rurale.** Toutes les personnes vivant à l'extérieur des régions urbaines.

**Population rurale non agricole.** Toutes les personnes qui vivaient dans une région rurale mais n'étaient pas membres de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale non agricole comprenait toutes les personnes vivant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

**Population rurale agricole.** Toutes les personnes demeurant dans des régions rurales, qui font partie de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale agricole comprenait toutes les personnes vivant dans des logements situés dans des fermes de recensement dans des régions rurales.

## CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

In addition to random rounding, for certain very small areas, to avoid publishing meaningless and potentially misleading data, and to absolutely avoid disclosure, a procedure referred to as "area suppression" has been adopted. Basically, the geographic area itself, as well as all data, is dropped completely from the tabulation in cases where there are fewer than 50 persons for self-enumeration areas and fewer than 25 persons for canvasser areas. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. "Area suppression" is applied only to the sample data file, affecting the Profile Series B of bulletins and all of the User Summary Tape/Fiche program. In the case of income distributions, data are deleted if the total non-inmate population concerned is less than 250. This applies to the User Summary Tape/Fiche program, at the census tract and census subdivision levels, and within the Profile Series B.

The actual census tract (CT) or census subdivision (CSD) suppressed due to the rule described is indicated in the appendix to each Series B bulletin affected. Basic population counts, land area (and other data collected on a 100% basis) for these "missing" or suppressed entities can be obtained from the corresponding Profile Series A of bulletins, or tape and fiche program. (See Products and Services of the 1981 Census of Canada.)

Further, for certain subject-matter areas in the national and provincial bulletin series - income and industry/occupation - users will note the suppression of distributions where less than 250 persons or units are involved. In this case, the total area concerned is not suppressed, and as in "area suppression", such suppressed information is included in higher aggregates.

## CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

Outre l'arrondissement aléatoire, pour éviter de présenter des renseignements inutiles et possiblement erronés et pour éliminer absolument toute divulgation, on a adopté, dans le cas de très petites régions particulières, une procédure connue sous le nom de "suppression des régions". Il s'agit essentiellement de supprimer complètement d'un tableau les régions géographiques elles-mêmes (et toutes les données) lorsqu'elles comptent moins de 50 habitants pour les secteurs d'autodénombrement ou moins de 25 habitants pour les secteurs de recensement par interview. Toutefois, les données supprimées sont incluses dans les totaux et totaux partiels à un niveau agrégé supérieur. Cette procédure s'applique seulement au fichier des données-échantillon, c'est-à-dire aux bulletins de la Série des profils B et au programme des bandes sommaires et des microfiches. Dans le cas des répartitions de revenus, les données sont supprimées lorsque le nombre total des pensionnaires hors institution visés est inférieur à 250. On applique également cette méthode au programme des bandes sommaires et des microfiches, au niveau des secteurs de recensement et des subdivisions de recensement ainsi que dans la Série des profils B.

Le secteur de recensement (SR) ou la subdivision de recensement (SDR) supprimés en raison de cette règle sont indiqués à l'annexe de chaque bulletin de la Série des profils B en question. Les principaux chiffres de population, les superficies (et les autres données recueillies sur une base de 100 %) pour ces entités manquantes ou supprimées sont présentés dans les bulletins correspondants de la Série des profils A ou sur les bandes et microfiches. (Voir Produits et services du recensement du Canada de 1981.)<sup>iv</sup>

En outre, pour certains sujets spécialisés (revenu, activité économique et profession) traités dans les bulletins de la Série nationale et de la Série provinciale, les utilisateurs noteront que les répartitions touchant moins de 250 personnes ou unités ne sont pas présentées. Dans un tel cas, la région complète n'a pas été éliminée, et comme pour la suppression de régions, les données manquantes figurent à un niveau agrégé supérieur.

Further slight variations may exist in certain other circumstances, and more complete details on suppression will be contained in the Summary Guide - Sample Population (Catalogue No. 99-903).

## SAMPLING AND WEIGHTING

The 1981 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly.

For any given geographic area, the weighted population, household, dwelling or families, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

## DATA QUALITY

### Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of net (i.e. uncanceled) random error increases as the population or cell size decreases. Thus small data values should be used with some caution.

Other of the errors will tend not to cancel out as they will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors, processing errors and to sampling errors, in addition to any errors introduced by random rounding.

### Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is expected to be fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

Il est possible que d'autres variations minimes existent ailleurs auquel cas le Guide sommaire - Population-échantillon (n° 99-903 au catalogue) en donnera des renseignements plus détaillés.

## ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la seconde méthode et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence.

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (autre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

## QUALITÉ DES DONNÉES

### Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires nettes (c'est-à-dire qui ne se sont pas annulées) augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

Des erreurs d'observation, des erreurs de réponse, des erreurs de traitement et des erreurs d'échantillonnage en plus des erreurs d'arrondissement aléatoire ont pu influencer sur la qualité des données fournies dans le présent bulletin.

### Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le (ou la) compte plus d'une fois. Étant donné qu'on s'attend à ce que le surdénombrement soit assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

A special study was undertaken in relation to the 1981 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1976 Census.

#### Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

#### Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

#### Sampling Error

Data based upon responses collected on a sample basis and then weighted are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error that sampling has introduced will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values this potential error, as a proportion of the cell value, will be relatively large.

The following table provides approximate measures of the error due to sampling. These measures are intended as a general guide only.

On a entrepris une étude spéciale sur le recensement de 1981 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1976.

#### Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

#### Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

#### Erreur d'échantillonnage

Les données qui sont basées sur les réponses recueillies auprès d'un échantillon et qui sont ensuite pondérées sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

Le tableau suivant présente une évaluation approximée de l'erreur provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

**Table: Approximate Standard Error Due to Sampling for 1981 Census Sample Data**

**Tableau: Erreur type approximée provenant de l'échantillonnage des données-échantillon du recensement de 1981**

| Approximate<br>Standard<br>Error | Cell Value - Valeur des cases |     |     |     |       |       |       |        |        |        |         |         | Erreur<br>type<br>appro-<br>ximée |
|----------------------------------|-------------------------------|-----|-----|-----|-------|-------|-------|--------|--------|--------|---------|---------|-----------------------------------|
|                                  | 50                            | 100 | 200 | 500 | 1,000 | 2,000 | 5,000 | 10,000 | 20,000 | 50,000 | 100,000 | 500,000 |                                   |
|                                  | 15                            | 20  | 30  | 45  | 65    | 90    | 140   | 200    | 280    | 435    | 600     | 1,300   |                                   |

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be  $1,000 + \text{or} - 3 \times 65$  or  $1,000 + \text{or} - 195$ ).

The standard errors given in the above table will not apply to population or universe (persons, households, dwellings or families) totals or sub-totals for the geographic area under consideration (see Sampling and Weighting above). The effect of sampling for these cells can be determined by comparison with a corresponding 100% bulletin.

The effect of the particular sample design and weighting procedure used in the 1981 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the above table may, therefore, understate or overstate the error due to sampling. Factors which can be applied as an adjustment to these standard error values for each individual variable may be obtained by contacting the nearest Statistics Canada reference centre (see inside front cover).

These adjustment factors, additional information on the census methodology - in particular on sampling and weighting - and a more comprehensive assessment of the quality of the census data collected on a sample basis will be included in Data Quality - Sample Population (Catalogue No. 99-905).

## SPECIAL NOTES

### Structural Type Data

The reporting of Structural Type of dwelling in any census or survey can be expected to be subject to potentially significant response error. This is perhaps due in part to the variety of sometimes complex structures, regional differences in terminology, and local real estate advertising. The level and nature of this error have been shown to vary according to the methodology used to collect the data. For the 1976 Census, the Structural Type was determined by the Census Representative. For the 1981 Census the Structural Type was determined by the respondent.

Les utilisateurs qui désirent connaître l'erreur approximée provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon 20 %, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type, l'utilisateur peut en général être raisonnablement certain que la valeur réelle de la population recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple pour une case dont la valeur est 1,000, l'écart s'étendra de  $1,000 + \text{ou} - 3 \times 65$  ou  $1,000 + \text{ou} - 195$ ).

Les erreurs types données dans le tableau ci-dessus ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération ci-dessus). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant le bulletin correspondant qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisées au recensement de 1981 varieront, cependant, d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau ci-dessus pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage. Pour obtenir les facteurs qui peuvent servir à rectifier les valeurs de l'erreur type de chaque variable, on peut s'adresser au centre de référence de Statistique Canada le plus proche (voir les renseignements au verso de la couverture avant).

Ces facteurs de rectification ainsi que des renseignements additionnels sur la méthodologie du recensement (plus particulièrement sur l'échantillonnage et la pondération) et une évaluation plus complète de la qualité des données du recensement recueillies auprès de l'échantillon paraîtront dans le bulletin Qualité des données - Population-échantillon (n° 99-905 au catalogue).

## NOTES SPÉCIALES

### Données sur le type de construction

La déclaration du type de construction d'un logement lors d'une enquête ou d'un recensement fait souvent l'objet d'erreurs de réponse importantes. La situation est sans doute attribuable en partie à la diversité des constructions quelquefois complexes, aux différences de terminologie d'une région à l'autre et à la publicité locale dans le domaine de l'immeuble. Il a déjà été prouvé que le niveau et la nature de cette erreur de réponse variaient selon la méthode utilisée pour recueillir les données. Au recensement de 1976, c'est le recenseur qui a établi le type de construction, alors qu'au recensement de 1981, le recensé s'en est chargé.

Analysis has shown that the 1976 data contained substantially fewer errors than the 1981 data for this variable. Comparisons between 1976 and 1981 Census data for Structural Type will therefore reveal certain inconsistencies. (Note: The count of dwellings is not in question, only how the total number of dwellings is broken down into Structural Type.) These inconsistencies will vary in degree from one geographic area to another and from one Structural Type to another.

Geographically the degree of error in dwelling classification is highest in the core areas of larger cities; those areas with older and converted or complex structures for which proper classification by respondents would be more difficult. The degree of error decreases as one moves outward from the core areas. Indeed there do not appear to be data quality problems in this regard for rural areas.

From the structural perspective the counts for Apartments in buildings with five or more storeys are believed to be relatively accurate. Counts for other types of dwellings in multiple unit structures (e.g., Apartments in buildings of less than five storeys and Row Houses), on the other hand, may contain varying degrees of error. For these dwellings there have been two types of misclassification. First, there are misclassifications among various types of the multiple unit structures. For example, Apartments in buildings of less than five storeys have frequently been classified as Row Houses, Semi-detached, etc. Second, there are some misclassifications between multiple and single structures. For example, a Duplex may have been misclassified as a Single Detached.

A substantial amount of the Structural Type error is misclassification among multiple unit structures. For this reason the user is advised to use the 1981 Census Structural Type data, whenever possible, by collapsing into four categories: Single Detached, Apartment in a building with five or more storeys, Movable (i.e. Mobile and Other Movable), and All Other. The error in the aggregated data will be reduced but it will not be eliminated. The misclassification of dwellings in multiple unit structures can be expected, where it occurs, to result in an under-reporting for the "All Other" category and a compensating overreporting for Single Detached. The significance of this error (as a percentage) in the count of Single Detached can be expected to decrease as the proportion of true Single Detached in the geographic area increases.

L'analyse a montré que les données de 1976 renfermaient beaucoup moins d'erreurs que celles de 1981 en ce qui concerne cette variable. Les comparaisons faites entre les données des deux recensements au sujet du type de construction révéleront donc certaines incohérences. (Nota: Le nombre de logements n'est pas remis en question, c'est seulement la façon de répartir le nombre total de logements selon le type de construction.) Ces incohérences varieront en importance d'une région géographique à l'autre et d'un type de construction à l'autre.

Au niveau géographique, le degré d'erreur dans le classement des logements est plus fréquent dans le centre des grandes villes; c'est en effet dans ces régions que l'on retrouve de vieilles constructions ou des édifices transformés ou complexes que les recensés ont bien du mal à classer. Le degré de l'erreur décroît à mesure que l'on s'éloigne du centre de la ville. En effet, il ne semble pas y avoir de problèmes de qualité de données à cet égard dans les régions rurales.

Du point de vue de la construction, le nombre d'appartements dans les immeubles de cinq étages ou plus est, croyons-nous, relativement exact. Le nombre d'autres genres de logements dans des constructions à logements multiples (par ex., des appartements dans des immeubles de moins de cinq étages et des maisons en rangée), peut par contre, renfermer ce genre d'erreur mais à des degrés divers. Nous avons relevé deux genres de classement erroné pour ces logements. En premier lieu, il y a eu classement erroné parmi les divers types de construction à logements multiples. Par exemple, des appartements dans des immeubles de moins de cinq étages ont fréquemment été classés comme maisons en rangée, maisons jumelées, etc. En second lieu, il y a eu erreur au niveau des constructions multiples et individuelles. Par exemple, un duplex a pu être classé par erreur comme une maison individuelle non attenante.

Une forte proportion de l'erreur du type de construction est survenue pour les constructions à logements multiples. Pour cette raison, l'utilisateur serait avisé, toutes les fois qu'il recourt aux données du recensement de 1981 sur le type de construction, de les regrouper si c'est possible selon les quatre catégories suivantes: maisons individuelles non attenantes, appartements dans un immeuble de cinq étages ou plus, logements mobiles (c.-à-d. les habitations mobiles et les autres logements mobiles) et tous les autres. L'erreur dans les données agrégées décroîtra mais elle ne sera pas éliminée. On peut s'attendre à ce qu'un classement erroné des logements dans des immeubles à logements multiples, lorsqu'il se produit, entraîne un sous-dénombrement de la catégorie "tous les autres" et un surdénombrement équivalent dans le cas des maisons individuelles non attenantes. On peut s'attendre à ce que l'importance (en pourcentage) de l'erreur au niveau du nombre de logements individuels non attenants diminue à mesure qu'augmentera le nombre "réel" de logements individuels non attenants dans la région en question.

For many tabulations (Census Tract, Census Subdivision, Census Division, Census Metropolitan Area, Province level tabulations, as examples) it is possible (with some cross-reference to other 1981 Census information and to 1976 Structural Type data) to determine whether for the particular geographic area there is a data quality problem for Structural Type, the degree of this problem, and most probably how the data have been misclassified.

The procedure is based upon Period of Construction data. These data, which were collected on a sample basis in the 1981 Census, permit the identification of new construction - i.e. of occupied dwellings constructed in the period 1976-1980 plus those constructed in the first five months of 1981. To the extent that dwelling stock is stable (ideally no conversions and no demolitions) over a five-year period, then adding the new construction - obtained from the 1981 Census data - to the 1976 Census Structural Type counts should yield values close to those for the 1981 Census. While differing vacancy rates, demolitions and conversions (among other things) must be taken into consideration, the degree to which these adjusted counts do not agree with 1981 counts by Structural Type should give a clear indication of the quality of the data - both 1981 and 1976.

Three basic steps are involved in making this assessment of the quality of the data:

- (1) Ascertain the 1976 Census geographic area corresponding to the 1981 Census geographic area for which Structural Type data are being tabulated.
- (2) Bring together, for the given geographic area (or areas), the 1976 and 1981 Structural Type data with the 1981 data cross-tabulated by Period of Construction (Sample data) and add counts for 1976-1981 Period of Construction to 1976 counts by Structural Type to produce "adjusted 1981 Counts". (The two 1981 Apartment categories must be added together for this purpose.)
- (3) Compare the 1981 Census counts by Structural Type with the adjusted 1981 Census counts by Structural Type and assess differences.

Pour bon nombre de totalisations (par ex., au niveau des secteurs de recensement, subdivisions de recensement, divisions de recensement, régions métropolitaines de recensement et provinces), il est possible (avec certains recoupements à d'autres données du recensement de 1981 et aux données sur le type de construction de 1976) d'établir s'il y a un problème de qualité dans les données sur le type de construction pour une région géographique particulière, la nature du problème et, très probablement, la raison du classement erroné.

La méthode se fonde sur les données touchant la période de construction. Ces données, qui ont été recueillies auprès d'un échantillon au recensement de 1981, permettront d'identifier les constructions neuves, c'est-à-dire les logements occupés construits au cours de la période 1976-1980 ainsi que ceux qui ont été construits dans les cinq premiers mois de 1981. Dans la mesure où le stock de logements est stable (idéalement, il n'y aurait ni transformation ni démolition) au cours d'une période de cinq ans, si l'on ajoute la construction neuve - chiffres que l'on a obtenus au recensement de 1981 - aux chiffres sur le type de construction au recensement de 1976, on devrait pouvoir obtenir des valeurs assez près de celles qui ont été obtenues au recensement de 1981. Bien que les différents taux d'inoccupation, les démolitions et les transformations (entre autres) doivent être pris en considération, l'écart entre ces chiffres rectifiés et les chiffres de 1981 selon le type de construction devrait nous donner une indication claire de la qualité des données, tant pour 1981 que pour 1976.

L'évaluation de la qualité des données se fait en trois étapes:

- (1) S'assurer que la région géographique au recensement de 1976 correspond à celle du recensement de 1981 pour laquelle on a totalisé des données sur le type de construction.
- (2) Regrouper, pour une ou des régions géographiques données, les chiffres de 1976 et de 1981 sur le type de construction aux recoupements de 1981 selon la période de construction (données échantillonnées) et ajouter les chiffres de la période de construction 1976-1981 aux chiffres de 1976 selon le type de construction, ce qui produira les chiffres rectifiés de 1981. (À cette fin, il faut additionner les chiffres des deux catégories de 1981 sur les appartements.)
- (3) Comparer les chiffres du recensement de 1981 sur le type de construction aux chiffres rectifiés de ce même recensement et évaluer la différence.

Period of Construction (for period 1976 to 1981) data cross-tabulated by Structural Type are being specially prepared for use in carrying out this procedure. (If there has been no new construction for the geographic area of interest then the Period of Construction data will not be needed and 1976 Structural Type data can be compared directly with the appropriate 1981 Structural Type data.) These tabulations and a more detailed description of the procedure with interpretative notes are available upon request. See inside front cover on how to obtain more information.

Further information on the quality of the Structural Type data will be included in Data Quality - Total Population (Catalogue No. 99-904).

### Rural Farm Population

It is quite probable that the counts shown for "rural farm population" are below the 1976 counterparts due to the more exclusive nature of the 1981 definition - see "Rural Farm Population" in the definition section.

### REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

### SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.

Les données sur la période de construction (pour la période 1976 à 1981) avec recoupements selon le type de construction sont préparées spécialement pour effectuer cette procédure. (S'il n'y a eu aucune construction neuve dans la région en question, les données sur la période de construction ne seront pas alors requises et les données de 1976 sur le type de construction pourront être comparées directement avec les données correspondantes de 1981.) On peut obtenir sur demande ces totalisations ainsi qu'une description plus détaillée de la procédure accompagnée de notes d'interprétation. Pour plus de renseignements, prière de se reporter au verso de la couverture avant.

D'autres renseignements sur la qualité des données portant sur le type de construction paraîtront dans le bulletin n° 99-904 au catalogue intitulé Qualité des données - Population totale.

### Population rurale agricole

Il est fort probable que les chiffres de la "population rurale agricole" soient inférieurs à ceux de 1976 en raison de la nature plus restrictive de la définition de 1981 - voir "Population rurale agricole" dans la partie des définitions.

### PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.

**Table 1. Occupied Private Dwellings by Tenure, Showing Period of Construction, for Canada and Provinces, Urban Size Groups, Rural Non-farm and Rural Farm, 1981**

**Tableau 1. Logements privés occupés selon le mode d'occupation, par période de construction, Canada et provinces, régions urbaines par groupe de taille et régions rurales non agricoles et rurales agricoles, 1981**
